Summary

As a Frontend Developer, I enjoy crafting modern websites that are not only beautifully designed but also fast and reliable. My daily tools are HTML, CSS, JavaScript and React, but I am passionate about learning something new every day, whether it's a fresh technology, a brilliant web design concept or a handy trick. I believe that a lot of people's lives have been improved and can further be enhanced by the benefits of our World Wide Web, therefore I want to contribute my fair share to its development.

Experience

Personal Projects

GitHub Portfolio

2020 - Present (1 year 11 months +)

Creating personal websites, mockups and applications that help further my web development knowledge and experience. A few of my projects are Aqva-vr, Zerobank, Splice-clone and Cinemateca.

Volunteer

Colegiul Național Moise Nicoara

2019 - 2019 (1 year)

Designed and developed a website for the Mathematics section of the school. Worked in a small team with a few colleagues. Added tens of resources for mathematics enthusiasts: problems, articles, events, Olympiad awards and results. A part of the resources were created by us, but a lot of them were submitted by aspiring mathematicians from our high school and middle school.

Freelance

Ell Boutique Arad

2018 - 2018 (1 year)

Worked directly with the owner of the company. Designed and developed a landing page for the business, showcasing the products. Ran a small marketing campaign on Facebook and in person, giving out flyers to other businesses and personalities from our city.
